Note PLEASE SPECIFY all substitutions and all options

PLEASE SPECIFY all substitutions and all options.

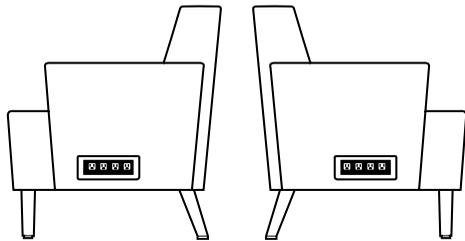

- A modular seating system composed of linking units in straight, inside curves, outside curves and corner units: standard sofa height backs, high backs and extended high back units. All units are compatible and can be used together in any combination to create a wide variety of layouts.
- These products can be upholstered in any standard GLOBAL UPHOLSTERY Fabric or Vinyl. Leather upholstery is available on special request and in general is only recommended for use on the seat. If more than one fabric or fabric / vinyl / leather combination is required, please fill in the FABRIC COMBINATION SKETCH specifying each fabric location. This form can be obtained on the website or by contacting customer service. Please submit the completed form to customer service to obtain accurate pricing.
- The unique 6.5" high tapered legs (Swaged leg) are the same for both seating and tables. It lightens the look, protects the upholstery from damage during the floor cleaning process and makes it easy to clean under the seating units. Metal finishes are Standard in Chrome (**CHR**) and available upon request in Tungsten (**TUN**), and Black (**BLK**). Please specify finish **No Upcharge**
- The tapered legs are welded steel, heavy duty construction. Each leg is bolted (securely fastened) directly to the sofa frame with 4 large bolts. This extremely robust construction insures trouble free performance in any environment. All legs on sofas, ottomans and tables are the same height.
- The tapered legs are equipped with Black non marking Glides as standard.
- Wood legs and casters are not available for this series.
- All cushioning is fixed and non-removable (cushions will not migrate in public spaces) and perimeter seams feature decorative single top stitch details which make seams lay flat and add extra seam strength.
- Frame is a heavy duty, interlocking plywood, puzzle box construction made for rugged activity environments. Seats are high density, highly resilient foam and are equipped with a synthetic rubberized webbing suspension system for extra comfort.
- Front edge or face of the seat angles slightly inward, so feet have freedom of movement and shoe heels don't rub on the face of the sofa. This inward slanting angle matches the inward angle of the back. Benches and connecting end tables also reflect the inward angles on the front and back faces. So all units offer a coordinated visual appearance.
- Most seating units (except round benches, and units with full height arms) and certain tables (as noted) can be ganged together with a quick connect / disconnect feature. Ganging hardware is standard and is factory installed, when not in use the ganging hardware swivels out of sight.
- Many tables (as noted below) and seating units (except round benches) can be equipped with Power / USB Modules. Each module includes two power outlets, two double USB terminals and a black 72" long three-prong power cord.
- Power / USB Module locations are predetermined and shown in the "electrical placement" sketch below. For seating the electrical location is the side of the seat or the outside of the arm. Electrical units must be factory installed.
- To add a Power / USB module to any product: From the electrical location chart shown below add P1, P2, P3, P4, P5 or P6 after the product model number (note on a seating unit if both right and left locations are required add P5 to the model number) and add the upcharge for each location required Add \$ 555
- Power/USB modules are available in either: White or Tungsten face plates with white power / USB receptacles, or with a Black face plate and Black receptacles (the units body and support attachment hardware which are not visible are finished in anodized Aluminum).
- Tables are made with High Pressure laminate and coordinate with the laminate finishes for Global Casegoods and wood seating. Specify laminate finish from the Princeton section of the price list. Custom High Pressure laminate finishes will be considered upon requested.
- Left or Right Arm location is always determined from a seated position.
- **River High traffic version"**
- High traffic versions have the same puzzle box frame construction except the faming wood is 1" thick rotary cut Birch plywood and all arm, seat and back cushions are made with Ultracell foam.
- River High Traffic versions are rated for a 350 lb active load per seat and for 24 HR use, 356 days a year. Durability testing is done to 3X Bifma test criteria to insure units are appropriate for high traffic applications.
- High Traffic (HT) legs are the same heavy duty construction as regular models.
- Like all Global seating, this product is ANSI and Bifma tested.
- Like all Global seating, this product is Greenguard Certified
- Select models will meet the requirements of California Technical Bulletin 133 (CAL133) when upholstered using appropriate upholstery materials. Depending on upholstery specified up charges will apply.
- Some assembly required, see RTA code with each item below.
- Measurement shown for Weight is for one unit, Measurement for Volume is per Carton.

Seating CDN

RIVER

ELECTRICAL PLACEMENT

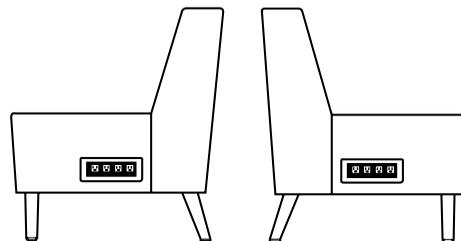

SOFT SEATING (Available on left, right or both sides)

With Arms, power outlet is located on the outside of the arms.

P1 (left side)

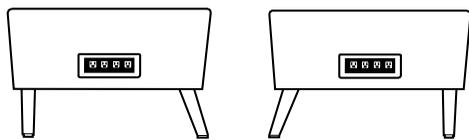

P3 (right side)

Armless, power outlet is located on the right side of the seat box.

P1 (left side)

P3 (right side)

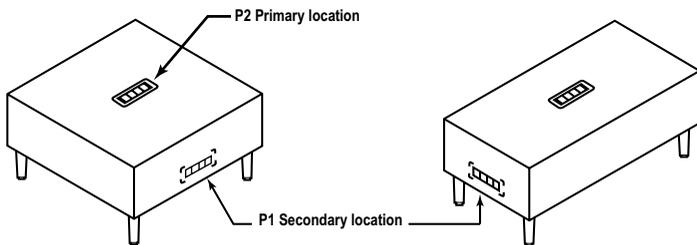

Benches, power outlet is located on the side of the seat.

P1 (left side)

P3 (right side)

COFFEE / END TABLES

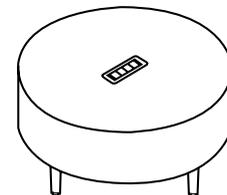

P2 (Centre) Primary location - top surface / centre. Models available for this electrical location are listed below. Secondary location P1 end / side of unit available on certain items.

7731 / 7732

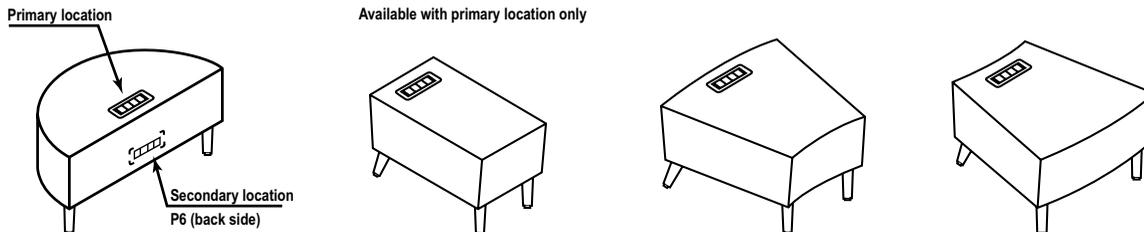

7733

Available with primary location only

7734 / 7735

P4 (Rear) Primary location - top surface / edge. Models available for this electrical location are listed below. Secondary location P6 back / side of unit available on certain items.

7736 / 7737

7738

7739 / 7740

7741 / 7742

Note: Electrical outlets are available in the following combinations:
White receptacle with white face plate, white receptacle with silver face plate and black receptacle with black face plate.
